B.Twomey is an Australian abstract artist who creates bold canvas art from her Brisbane studio. B's artwork is striking, inspired by colour, mood, emotion and season. Her artwork celebrates Australian life in bold colours and forms.

Born and raised in Far North Queensland, Bernadette has travelled extensively in both Australia and overseas. This lived experience through place and the emotional memory of colour is reflected in her stunning, bright, bold art.

This piece came from a quieter place – a love letter to the bush when the sun is low and everything softens. I pulled back the colour palette on purpose, choosing deep olives, earthy greens, rich navy, and just a whisper of white for lightness.

There's something meditative about painting this way – slower strokes, more intention, letting the forms feel like they're gently unfolding rather than bursting out. The patterns are still playful, but there is a calm beneath them.

It's a more refined take on my usual wildness. Still layered, still full of movement, but with stillness I think you can feel when you're in the room with it.
