Kristyna Dostalova is a talented and passionate artist based in Melbourne. Kristyna brings her feelings to life through oil or acrylic on canvas, her preferred medium for its textures and viscosity. Her style is often described as abstract, but she also enjoys painting anything that inspires her.

She is self-taught and honed her craft as a child growing up in the Czech Republic. The vibrant landscapes and flora of Australia inspired Kristyna to fully embrace her passion for art, which is reflected in her current work inspired by living in Sydney.

I made this aerial painting of the rockpools at Ricketts Point. When the tide goes out, these pools come alive with all sorts of sea life. I sit there for hours just watching tiny fish, bits of seaweed, plants and starfish doing their thing. The water's always so clear you can see everything. This spot's become my fave place in the whole bay to hang out and just chill.
