Sarah Rowe, known as "Miss Moresby," is an artist specialising in textile design and painting. With a fine art background, she finds beauty in everyday objects and transforms them into vibrant works. Her bold style features organic botanical forms and abstract motifs, inspired by the patterns and landscapes around her. Through her art, Sarah explores colour and pattern to create striking, visually engaging compositions. Her versatility and dedication continue to make a distinctive mark in the art world.

An expressive oil painting that draws together marine life, botanical forms and decorative pattern. Brightly coloured fish weave through a richly layered landscape of imagined flora, while carefully applied dots, lines and repeated shapes create texture and visual depth. The playful composition celebrates abundance, curiosity and the beauty of the underwater world.
