Sarah Rowe, known as "Miss Moresby," is an artist specialising in textile design and painting. With a fine art background, she finds beauty in everyday objects and transforms them into vibrant works. Her bold style features organic botanical forms and abstract motifs, inspired by the patterns and landscapes around her. Through her art, Sarah explores colour and pattern to create striking, visually engaging compositions. Her versatility and dedication continue to make a distinctive mark in the art world.

A botanical themed oil painting pieced together with a love of painting and the natural world. Flowery and leafy motifs appear at random on the canvas at underpainting stage. Intandem with Sarah's latest suburban walk around East Brunswick in Victoria, shapes and natural patterns are mentally collected and then almost subconsciously appear in this work.
